

INTERNET SCANNER

System Requirements

Version 7.0, April 22, 2003

Overview

Introduction

This document contains the system requirements for Internet Scanner version 7.0. These requirements are subject to change. You can find the latest version of these requirements on the Internet Security Systems Web site at <http://www.iss.net/support/documentation/>.

About the Internet Scanner application

The Internet Scanner application scans any IP version 4 addressed device connected to the network by using vulnerability checks that attempt to detect known security issues.

About Internet Security Systems (ISS)

Founded in 1994, Internet Security Systems (ISS) (Nasdaq: ISSX) is a pioneer and world leader in software and services that protect corporate and personal information from an ever-changing spectrum of online threats and misuse. Internet Security Systems is headquartered in Atlanta, Georgia, with additional operations throughout the Americas, Asia, Australia, Europe, and the Middle East. For more information, visit the Internet Security Systems Web site at <http://www.iss.net> or call (888) 901-7477.
